

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation that consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States partner, Doosan Infracore America Corporation, situated in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer wishes.

With a system consisting of over 90 autonomous dealers, the forklift group provides quality materials handling equipment to the comprehensive North American marketplace. Doosan Infracore America Lift Truck sellers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The forklift product line impressively features 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various truck versions range from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American market, thanks to its excellent level of product performance and their persistently high level of client support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division based in Cleveland has a professional team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a nationwide machinery expansion venture. Early sales of this industrialized equipment focused on large business groups, the armed services and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction became the new focus for enhancing quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a situation of substantial growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to respond to competitive pressures in the US materials handling industry. This plan radically expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a modern plant which helped launch the business for the fabrication of high added-value products suitable for export. In 1993, the corporation had a global sales system and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
