

Drum Clamps

Drum Clamp - Forklifts are used to handle storing, lifting and moving pallets. For businesses which deal with items in drums, you will need to use an attachment so as to store, move and lift them. There are several drum forklift accessories that you can obtain for all of your drum storing, moving and lifting requirements. These attachments are particularly meant in order to handle drum containers - hence there is no chance of damage to the product or drum container whenever they are stored, moved or lifted.

Drum Positioner And Grab

The drum positioner can be utilized in order to load and unload drums off of vehicles, racks, and drum stands. These are available in three and four tine models. This accessory is fully automatic, thus enabling the one operating it to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This attachment is intended for drum pyramid stacking.

The drum grab is fork designed and mounted with the sole purpose of handling steel drums which have rolling hoops. Although the purpose for the design was to handle steel drums with rolling hoops, the drum grab can accommodate the moving of extra large and large plastic drums. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

The Rotator

The drum rotator is another forklift attachment which mounts onto the blades themselves. Their objective is to pick up the drum and rotate it upside down. The drum is clasped into the drum rotator utilizing a clamp which fits around the middle of the drum. The rotation is performed by either a continuous loop chain or a crank handle. The crank handle is intended for operations which occur below shoulder level. For operations which must take place over shoulder level, the continual circle chain will be used.

The drum tines are carriage mounted or simple fork attachments. They are utilized for unstacking and stacking 210-liter steel drums. Stacking involves nothing elaborate, just simple horizontal placement of the drums. The carriage-mounted accessories lessen the load center of the drums.

Automatic Tongs

Drum tongs are available both automatic and semi-automatic versions that can be utilized in the open topped and tight head steel drum kinds. The drum tongs can likewise be attached several various ways to the lift truck. One method is to connect them underneath a fork-mounted hook. One more way is to connect them to a carriage mounted jib or a fork-mounted jib. Both the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the person operating it to ever leave the seat of the lift truck.

Rim Grip Handler

When drums require storage with inadequate spacing accessible, the Rim Grip Drum Handler is the perfect alternative in drum forklift attachments. This accessory will work for both the 210 L drums in addition to 120 L drums. The Rim Grip Handler works by using steel jaws in order to hold the rim of the drum. It lifts the drum and puts it down without requiring any room between all of the drums. The typical unit in the industry is a zinc-plated handler, even if, this particular attachment comes obtainable in stainless steel for the food and drink industry.
